Bootstrap | MySQL | Agile Methodology
Basic Angular | OOPs | CSS | SDLC
HTML | MySQL | XAMPP | Postman
API Handling | Google Ads

CERTIFICATIONS & AWARDS

Mendix Advance Certification

Certified Web Developer- Seven

R&I DIGI TMS- BEST TEAM AWARD, TOLL GROUP

EMPOWERING MINDS AWARD- SHUBH FOUNDATION

WORK EXPERIENCE - [2 years]

Capgemini [Outsourced from Toll]
Associate Consultant   **Dec 2023 - Present**

- **Client Communication, Requirement gathering, Feasibility check (POC), Scrum Master Stand-In, Project Deliverables/Quality Assurance.**
- Continued to perform same role & responsibilities as in Toll.
- Worked on Azure APIM tool.

TOLL GROUP
Low Code Specialist   **July 2022 - Nov 2023**

- **Build many apps in Mendix** to digitalize the process that leads to increase in efficiency/reduced errors/improved collaboration.
- Develop, test, and deploy Mendix apps.
- **Other Roles & Responsibility : Client Communication, Requirement gathering, Feasibility check (POC), Scrum Master Stand-In, Project Deliverables/Quality Assurance.**
- Cross platform **integrations** with **Power BI, Web Methods, Microsoft Teams, Email, Azure AD.**etc
- Built **Design System** an reusable module which reduced 75% Developer efforts w.r.t UI .

SoftEzi Solutions
Associate Web Dev   **Jul 2021- Sept 2021**

- Optimized existing code (Website).
- Redesigned components to give a more attractive and user-friendly experience.
- Build and implement Proof of Concept (POC) evaluations to confirm the viability of proposed solutions.
- Involved in process to establish business digitally.

PROJECTS

1.Project: GL TMS   **Tech** : **Mendix**

Description: This application has major features such as Time Slot Booking & Driver Rostering. It helps to create booking using drag and drop functionality and monitor vehicle and driver.

Responsibilities:
- Build a module which has calendar view where drive current status such can be monitored and manged.
- Build complex **Microflows** to manage and modify objects.
- Involved in Solutioning phase, **Effort estimation**, High and Low-level design, UI design, Development, UAT support, Hypercare and Application handover.
- Designed the **architecture** and **flow of application.**
- Implemented **OIDC** for **SSO** - Azure AD
- Implemented **Email** Notification for Sending email using **Email Connector** module.
- **Domain Model**: Created Efficient & Optimized **Database**/ Domain Model.
- Used **XPATH** to constrain data & enhance security.
- Built **Custom Grid** Using List view to overcome data grid limitations.

2.Project: GF Control Tower   **Tech** : **Mendix**

Description: Control Tower EDI Tracker is stop gap solution for EDI monitoring, the application supports business users to have visibility on the B2B EDI and do a first level trouble shooting without the help of IT.

Responsibilities:
- Gathering requirement, effort estimation and feasibility check.
- Contributed in defining more efficient API flow.
- Integration with web methods.
- Worked on functionality to **consume** the **live data**, **send** the **updated data**.
- Worked on bulk uploads : **Importing exporting** data.

3.Support Project: iCON   **Tech** : **Mendix**

Description: An application from where an user can create an order & tracks the shipment. User gets a milestone and map view where they can see current location of their order. User can subscribe to service if they want continues update of order on email.

Responsibilities:
- Implemented and tested minor feature enhancements and updates to improve the application's performance and functionality.
- Assisted in diagnosing and resolving user-reported issues and bugs in a timely manner.

- Worked on feature to show milestones live tracking in map.

4.Project: Toll Group - Landing Page
[UI Focused application]

Description: This is website helps user to navigate to all Global logistics and Global Forwarding service that Toll provides.

Responsibilities:

- Built user friendly UI for end users.
- Successfully implemented a single-page view to eliminate the need for page reloads.

5.ADDITIONAL PRACTICES:

5.1. Reusable Module: Design System

Description: A reusable module which has all custom widgets as per toll branding. So, when developer imports this module all the widget gets updated & this resulted in reducing 75% developer efforts w.r.t UI.
- Ensured consistency in design elements and branding throughout the website.
- Built different styled theme template.

5.2.POC: Integration with **Microsoft Teams**:

- Resulted in sending message from Medix app to MS Teams (Used **Java Action**).
- Exposed **Rest service** so other apps can **consume service** and send updated status to **teams**.

5.3.POC: **Integration** With **Twilio**:
- Resulted in sending SMS/ Text to Phone Number (Used Java Action).
- **Exposed Rest service** so other apps can consume service and send **text message** to **phone number**.

5.4. Testing Tool:
- ATS • APD • AQM
